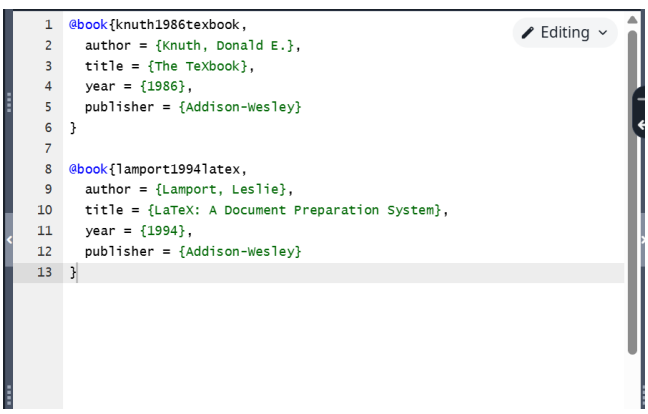
Laboratory work 6

Working with bib



```bibtex
@book{knuth1986texbook,
  author = {Knuth, Donald E.},
  title = {The TeXbook},
  year = {1986},
  publisher = {Addison-Wesley}
}

@book{lamport1994latex,
  author = {Lamport, Leslie},
  title = {LaTeX: A Document Preparation System},
  year = {1994},
  publisher = {Addison-Wesley}
}
```

Figure 1: LaTeX

BibTeX

```latex
\documentclass{article}
\usepackage[T1]{fontenc}
\usepackage[backend=biber, style=authoryear]{biblatex}
\addbibresource{biblio.bib}

\begin{document}

\section{biblatex Example}

This section demonstrates the biblatex package with author-year citations.

\subsection{Basic Citations}

Here are some example citations using biblatex:

\begin{itemize}
    \item Parenthetical citation: \parencite{knuth1986texbook}
    \item Text citation: \textcite{lamport1994latex}
    \item Multiple citations: \parencite{knuth1986texbook, lamport1994latex}
\end{itemize}

\subsection{Citation Not in Database}

Let's try citing a reference that doesn't exist in our database:
\parencite{nonexistent2024}
```

Conclusion

- Got acquainted with LaTeX
- Learned a new package
- Learned how to work with bibliographies ## {.standout}

Thank you for attention!
